

BEYOND THE PERIMETER

WARM-SEASON LAWN CARE PROGRAM FOR THE PCO

Expand your business beyond pest control with a streamlined lawn care program designed specifically for PCOs. By combining pre- and postemergent weed control, foundational turf insect management, surface pest applications, and preventative disease control into a streamlined seasonal approach, this program allows companies to confidently expand their service offerings while utilizing existing equipment, technicians, and customer relationships.

WARM-SEASON LAWN CARE PROGRAM

Timing	Primary Goal	Herbicide	Insecticide	Fungicide
Early Spring (before soil temps reach 55°F)	Winter postemergent cleanup + Grassy and broadleaf weeds seasonal preemergent	Post-emergent Expel (0.14 fl oz) Pre-emergent Prodiamine 4L (0.55 fl oz) <i>or</i> Dithiopyr 2EW (0.73 fl oz)		
Late Spring	Broadleaf and grassy weeds postemergent + Foundational insect control	Fahrenheit (0.14 oz) Spot spray: (0.2 oz/gal)	Contrado (0.28 - 0.37 fl oz)	
Early Summer	General weed, insect, and disease control	MSM Turf (0.5 oz)	Duraflex ZC (1 – 2 fl oz)	Strobe Pro (3 fl oz) <i>or</i> Strobe Pro G (4 lbs.)
Late Summer	General weed, insect, and disease control	Fahrenheit (0.14 oz) Spot spray: (0.2 oz/gal)	Duraflex ZC (1 – 2 fl oz)	Strobe Pro (3 fl oz) <i>or</i> Strobe Pro G (4 lbs.)
Fall	Winter annual weed cleanup + fall preemergent	Expel (0.14 fl oz) + Prodiamine 4L (0.55 fl oz)		

All rates are listed per 1,000 ft².

PRODUCT STRENGTHS

EXPEL

Active Ingredient: 39.6% Sulfentrazone

Pre- and postemergent control of select grassy and broadleaf weeds, with exceptional activity on yellow nutsedge and kyllinga with quick, visible results.

PRODIAMINE 4L

Active Ingredient: 40.8% Prodiamine

Preemergent control of crabgrass and other annual grassy and broadleaf weeds with excellent residual performance.

DITHIOPYR 2EW

Active Ingredient: 24% Dithiopyr

Flexible preemergent herbicide that also provides early postemergent control of crabgrass after germination.

FAHRENHEIT

Active Ingredient: 33% Dicamba; 5% Metsulfuron-Methyl

Broad-spectrum postemergent weed control in warm-season turf, including difficult weeds such as sedges, kyllinga, dollarweed, and spurge.

MSM TURF

Active Ingredient: 60% Metsulfuron Methyl

Excellent control of tough broadleaf weeds and selective suppression of certain grassy weeds in warm-season turf.

CONTRADO SC

Active Ingredient: 18.4% Chlorantraniliprole

Foundational insecticide for season-long control of grubs, caterpillars, and billbug larvae with a single early-season application.

DURAFLEX ZC

Active Ingredient: 3.95% Bifenthrin; 1.3% Novaluron; 1.3% Pyriproxyfen

Dual-action insecticide delivers fast knockdown and residual control of fleas, ticks, ants, and other nuisance pests.

STROBE PRO

Active Ingredient: 6% Azoxystrobin; 10% Propiconazole

Broad-spectrum systemic fungicide providing preventative and curative control of key turfgrass diseases. Available in liquid and granular formulations.
